PROFESSIONAL SUMMARY

Hardworking and passionate Computer Science Engineer with strong organizational skills eager to secure entry-level position. Ready to help team achieve company goals. I am here to seek and maintain full-time position that offers professional challenges utilizing interpersonal skills, excellent time management and problem-solving skills.

PROJECTS

1. [Personal Portfolio Website](#)

- Designed and developed a personal portfolio website using HTML5, CSS3, MySQL and JavaScript.
- Created a responsive layout that adjusts to different screen sizes using CSS3 media queries and bootstrap.
- Implemented dynamic animations and effects using JavaScript to enhance user experience.
- Integrated third-party libraries or frameworks such as jQuery to enhance the functionality and aesthetics of the website.

2. [Password Validator](#)

- A password validator built using ReactJs typically functions as a front-end tool to validate user-entered passwords based on predefined criteria.
- It ensures that the password adheres to security standards before submission.
- User-friendly Interface which updates in real time as the user types, indicating which rules are met.

- Supports criteria such as min/max length, inclusion of special characters, upper/lower case letters, numbers etc.

3. [Restaurant Management System](#)

- Eye-catching design with the restaurant's name i.e Foodeez, tagline, and featured dishes.
- Navigation menu for quick access to different sections.
- Categorized menu (Appetizers, Main Course, Desserts, Beverages).
- Add-to-cart functionality and real-time order summary with options to modify the cart.
- Registration/login functionality and social login options (Google, Facebook).
- Allow customers to leave reviews and rate dishes.
- Optimized for desktops, tablets, and mobile devices.
- Database for tracking reservations and automated notifications for confirmation or changes.

INTERNSHIP

Associate Software Developer | [Market Creators](#)

(May'24 - Nov'24) | Noida,UP

- Assisting in troubleshooting and providing technical support for software issues including maintainance of their official website.
- Proposing improvements to software design and functionality.
- Learned creating user manuals, technical guides, or comments for future reference.
